-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 23, 24, 25, 26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Suto et al (US Patent No. 5484759).

Suto et al discloses (Col. 3, lines 25 to Col. 4, line 58) an electrophotographic image-receiving sheet comprising:

a support; and

a toner-image-receiving layer containing at least a thermoplastic resin (see page 43 of the present application for examples of thermoplastic resins) and being arranged at least on one side of the support, and

having an indicator (note the definition of the term indicator given at page 35 of the present application) on its back side (Col. 4, lines 51-58; Col. 6, lines 46-53).

As to claims 24 and 25, it should be noted that the process used for forming the indicator is not given patentable weight in a product-by-process claim. See MPEP 2113. Note Example I-1 which discloses that the detection mark is formed by printing in a production process of the electrophotographic image-receiving sheet.

As to claim 26, it is submitted that Suto et al teaches that the indicator is a picture or a pattern. Col. 6, lines 51-53.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Suto et al.

Suto et al discloses essentially the claimed invention except the limitation "wherein the indicator is arranged on the entire back side of the electrophotographic image-receiving sheet".

However, Suto et al also teaches that the shape and the number of the detection marks are not particularly limited and may be suitably selected. Col. 6, lines 51-53.

Therefore, it is submitted that it would have been obvious to one of ordinary skill in the art to provide the detection marks (indicator) on the entire back side of the electrophotographic image-receiving sheet of Suto et al so that location of the detector for the detection mark is not limited.

Allowable Subject Matter

6. Claims 1-22, 28-34 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter:

The claims are allowable for the primarily for the reason that prior art of record do not teach or

Art Unit: 2861

suggest an image forming process, an image forming apparatus for forming an electrophotographic print comprising the limitations recited in base claims 1, 28 and 31.
